1. After watching the video answer the following questions (puntuación máxima 2 puntos)

- a) What type of company is Total Event Production and what type of service do they provide? Give at least 6 different types of service (puntuación máxima 0,60 puntos)
- b) What gear do they have? Give at least 10 different items (puntuación máxima 1,00 puntos)
- c) In what type of events have they been involved? Give at least 3 different events (puntuación máxima 0,40 puntos)

Reading and writing

Would you make a career in the audio-visual industry?

There is a lot to say about what an audio-visual technician is all about. It is a challenging job, it's a job that can earn your keep. It is also a great opportunity especially in the case, like I am as a show operator, you get to meet a lot of very interesting people and have a lot of fun. And you learn a lot. I have worked in a lot of professional conferences, shows and events. Some of them are boring, some of them you learn something, but you are always earning a living.

In the movie industry, the television commercial industry or the tv series industry, most of the projects are done with union operators. Some of the commercials and smaller things might work with non-union scenarios, but a lot of the major industries, the Hollywood movies, and so on, those tend to be mostly union shops. Of course, you need to get involved with the union registration I don't know enough about that to tell you what to do there, but they do the big gigs, you can sometimes see at the end of concert 50 or 100 guys waiting for the end of a concert then they come in and quickly dismantle the entire stage set.

Some of the larger events will have their own dedicated crew members and they will hire locally to bring in the gigs. Often the experienced technicians won't get into the really big ones because if the shows are put together, like the big concerts with the major performers out there, they often have their own people who are very familiar with the sound setup for the show and, they don't even use local talent for that.

You will often hear about the exciting opportunities, the great chances you will have. I can tell you stories about having put microphone on famous politicians and movie stars, or I even put a microphone with Johnny Depp. It sounds exotic putting a microphone on a lapel, but you don't get to interact with them, and so on.

Also, the other part of this thing is that your life is constantly changing. There is no schedule, there is the beautiful moments, the light moments, the hard-working moments. Times you sweat like crazy hauling equipment around lifting heavy equipment. Then, there is the easy parts where the show is on and you're sitting around making sure the sliders are moving your mixer board and that the lights are on, giving the cues and things like that.

Hopefully you have got a second income that you can also promote during the down times. One of the bad things about this, that makes it very hard for you to plan budgeting and even for things like holidays, because you don't want to take holiday if it's going to mean you're going to lose a week or two weeks of events. So quite often you even have difficulty making holidays.

1) Are the following statements TRUE or FALSE?. Copy the evidence from the text. No marks are given for only TRUE or FALSE. (puntuación máxima 1 punto)

- a) Audio-visual professional organizations are the ones which provide this industry big sectors with workers
- b) Routine and fixed schedules are common in audio-visual operators' daily life.

2) In your own words and based on the ideas in the text, answer the following questions (about 40 to 60 words each answer). Do not copy from the text. (puntuación máxima 2 puntos)

- a) Describe the different ways of working in this industry this text talks about!
- b) Why would you like to make a career in the audio-visual industry?

3) Find the words in the text that mean: (puntuación máxima 1 puntos)

- a) Become acquainted (paragraph 1)
- b) Advertisements (paragraph 2)
- c) Installation (paragraph 3)
- d) Gear (paragraph 5)

4) Complete the following sentences. Use the appropriate form of the word in brackets when given. (puntuación máxima 1 puntos)

- a) AV stands Audio and Visual. Audio is things to sound.
- b) Visual is (refer) to just about anything that has (do) with video.
- c) An audio-visual technician is who is well versed in all the equipment that they are going to be (involve) with.
- d) They need to understand not how to set it up, but also how to it and operate it.

5) Write minimum 150 words on the following topic (puntuación máxima 3 puntos):

In order to meet the exposure requirements of the medium you are shooting and the artistic requirements of the story, we need to be sure to have a wide range of lighting instruments and fixtures. According to this fact, describe the following instruments and fixtures: open-face lights, fresnels, barn doors, flood and spots, lamps, lenses, tungsten, fluorescent, HMI and soft boxes (or some other similar ones)
