## POSITIONS AND HONORS

I have been working for 7 years in basic research at the Faculty of Pharmacy and since 2007 I develop my research activity at "Diabetes, Obesity and Human Reproduction" group (DORH) of the Endocrinology and Nutrition Service of the Ramón y Cajal Hospital Madrid, Spain. DORH group is a member of the Spanish Biomedical Research Centre in Diabetes and Associated Metabolic Disorders (CIBERDEM). My research areas of interest include the application of "omics" techniques to the study of sex steroids and gonadal dysfunction (polycystic ovary syndrome or functional hypogonadotropic hypogonadism). My work include proteomics, miRNAs, metabolomics and microbiota to understand the development of abdominal adiposity and metabolic dysfunction of visceral adipose tissue.
