Pruebas para la obtención de títulos de Técnico y Técnico Superior

Convocatoria correspondiente al curso académico 2023-2024

(RESOLUCIÓN de 29 de diciembre de 2023, de la Dirección General de Educación Secundaria, Formación Profesional y Régimen Especial. BOCM de 12 de enero de 2024)

DATOS DEL ASPIRANTE			FIRMA
APELLIDOS:			
Nombre:	D.N.I. N.I.E. o Pasaporte:	Fecha:	

Código del ciclo: SANS06	Denominación completa del título: Técnico Superior en Higiene Bucodental (LOE)
Clave o código del módulo: CM14	Denominación completa del módulo profesional: INGLÉS TÉCNICO

INSTRUCCIONES GENERALES PARA LA REALIZACIÓN DE LA PRUEBA

- ✓ Cumplimentar los datos del aspirante antes del examen y firmar tanto el cuadernillo de preguntas como la hoja de respuestas.
- ✓ Se contestará en la hoja de respuestas. El cuadernillo de preguntas deberá devolverse. No se corregirá ningún examen que no vaya acompañado del correspondiente cuadernillo de preguntas.
- ✓ El examen consta de 40 preguntas y 3 de reserva que solo se tendrán en cuenta en caso de anulación de alguna pregunta.
- ✓ Se escribirán y se señalarán las respuestas con tinta indeleble (azul o negro). Marque con una X la respuesta correcta. Para anular una respuesta, tache totalmente el cuadro correspondiente y vuelva a marcar con una cruz la nueva contestación elegida, o déjela en blanco. No utilizar líquido corrector (Tippex). En caso de no quedar clara la respuesta seleccionada se considerará esa pregunta como no contestada.

CRITERIOS DE CALIFICACIÓN Y VALORACIÓN

$$\text{Nota del examen} = \frac{\text{Número de aciertos} - (\text{número de errores} \times 0,33)}{\text{Número de preguntas} / 10}$$

Para aprobar se deberá obtener una nota en el examen igual o superior a 5.

CUADERNILLO DE PREGUNTAS: INGLÉS TÉCNICO

PART 1: LISTENING

Choose A, B, C or D according to what you hear:

- 1. What is the reason for the patient's visit to the dental practice?**
 - a) Routine check-up
 - b) Tooth pain and suspected cavities
 - c) Teeth whitening procedure
 - d) Orthodontic consultation

- 2. What symptom does the patient mention experiencing?**
 - a) Swollen gums
 - b) Tooth sensitivity to hot or cold foods
 - c) Bleeding gums
 - d) Loose teeth

- 3. How does the dental hygienist suggest addressing the patient's cavities?**
 - a) Extracting the affected teeth
 - b) Ignoring the cavities as they will go away on their own
 - c) Filling the cavities to prevent further damage
 - d) Recommending a daily dose of pain medication

- 4. What does the dental hygienist mention about the procedure for filling cavities?**
 - a) It will cause severe pain
 - b) It will be performed without any numbing medication
 - c) It involves removing the decayed portion of the tooth and filling it with a composite material
 - d) It requires no further appointments

- 5. How long does the dental hygienist indicate the filling procedure typically takes?**
- a) 10-15 minutes
 - b) 1-2 hours
 - c) 3-4 hours
 - d) 5-6 hours
- 6. What is the purpose of numbing the area with local anaesthesia before filling cavities?**
- a) To make the patient feel uncomfortable
 - b) To ensure the patient does not feel any pain during the procedure
 - c) To make the patient fall asleep
 - d) To avoid staining the patient's teeth
- 7. How does the patient feel about the procedure after the dental hygienist explains it?**
- a) Anxious
 - b) Excited
 - c) Indifferent
 - d) Relieved
- 8. What does the dental hygienist say might occur after the procedure?**
- a) The patient may develop superpowers
 - b) The patient may experience permanent numbness
 - c) The patient may experience some sensitivity, but it should subside within a few days
 - d) The patient may experience immediate relief without any side effects
- 9. What is the primary goal of the dental hygienist during the interaction with the patient?**
- a) To scare the patient away from dental treatment
 - b) To make the patient feel uncomfortable and uninformed
 - c) To ensure the patient feels comfortable and informed
 - d) To rush through the conversation without addressing the patient's concerns
- 10. How does the interaction between the dental hygienist and the patient conclude?**
- a) The patient leaves feeling reassured and schedules a follow-up appointment
 - b) The patient leaves feeling anxious and decides to postpone the treatment indefinitely
 - c) The patient leaves feeling confused and unsure about the next steps
 - d) The patient leaves feeling frustrated and decides to seek treatment elsewhere

PART 2: READING

Read the text and answer A, B, C or D according to the content of the text:

Maintaining good oral hygiene is essential for overall health and well-being. It's not just about having a bright smile; it's about preventing serious dental issues and even systemic health problems. Regular dental check-ups and proper oral care at home play vital roles in achieving optimal oral health.

Brushing and flossing daily are fundamental habits that remove plaque, a sticky film of bacteria that forms on teeth. If left unchecked, plaque can harden into tartar, leading to gum disease and tooth decay. This can result in painful infections, cavities, and even tooth loss.

Routine visits to the dental practice are crucial for addressing any emerging issues early on. During these appointments, dentists and dental hygienists can perform professional cleanings, removing plaque and tartar that regular brushing and flossing may have missed. They also conduct thorough examinations to detect any signs of dental problems, such as cavities, gum disease, or oral cancer.

Neglecting regular dental visits can have serious consequences. Without professional cleanings, plaque and tartar can accumulate, increasing the risk of gum disease and tooth decay. Advanced gum disease can lead to bone loss in the jaw and even tooth loss. Moreover, untreated dental problems can cause chronic pain, difficulty eating, and speech problems.

Furthermore, poor oral health has been linked to various systemic health issues, including heart disease, diabetes, and respiratory infections. Bacteria from the mouth can enter the bloodstream, potentially contributing to inflammation and other health complications. Additionally, neglecting oral health can lead to cosmetic concerns such as bad breath, stained teeth, and gum recession, impacting self-esteem and social interactions.

In conclusion, good oral hygiene practices, including regular dental visits, are crucial for maintaining overall health and preventing dental problems. By prioritizing oral health, individuals can enjoy a confident smile and a healthier life.

11. What is the primary purpose of maintaining good oral hygiene?

- a) Enhancing vision
- b) Improving cardiovascular health
- c) Preventing dental issues and promoting overall health
- d) Strengthening bones

12. What can happen if plaque is not regularly removed from teeth?

- a) Decreased risk of gum disease
- b) Reduced tooth sensitivity
- c) Increased risk of cavities and gum disease
- d) Brighter smile

13. What is a common consequence of advanced gum disease?

- a) Decreased risk of tooth loss
- b) Reduced risk of heart disease
- c) Bone loss in the jaw
- d) Strengthening of the tooth enamel

14. Why are routine dental visits important?

- a) To avoid brushing and flossing at home
- b) To detect and address dental issues early
- c) To increase the risk of dental problems
- d) To save money on dental care

15. What can happen if dental problems are left untreated?

- a) Improved oral health
- b) Decreased risk of systemic health issues
- c) Chronic pain and difficulty eating
- d) Strengthening of teeth

16. How does neglecting oral health affect self-esteem?

- a) It has no impact on self-esteem
- b) It may lead to bad breath and stained teeth, impacting confidence
- c) It improves confidence in social interactions
- d) It decreases the need for dental visits

17. What systemic health issues have been associated with poor oral health?

- a) Improved cardiovascular health
- b) Decreased risk of diabetes
- c) Increased risk of heart disease and respiratory infections
- d) Enhanced immune system function

18. What can professional dental cleanings help prevent?

- a) Gum disease and tooth decay
- b) Stronger bones
- c) Reduced risk of tooth loss
- d) Chronic pain

19. How does bacteria from the mouth contribute to systemic health issues?

- a) It has no impact on systemic health
- b) It can enter the bloodstream and lead to inflammation
- c) It strengthens the immune system
- d) It prevents heart disease

20. What is one cosmetic concern associated with poor oral hygiene?

- a) Brighter smile
- b) Decreased risk of bad breath
- c) Stained teeth and gum recession
- d) Improved self-esteem

PART 3: GENERAL CONTENT

Choose A, B, C or D:

21. A receptive piece of glass used to check for plaque _____

- a) Explorer
- b) Probe
- c) Mirror
- d) Scaler

22. The patient liked the _____ because it made her teeth shiny.

- a) Polisher
- b) Mirror
- c) Bur
- d) Saliva ejector

23. Hard, white exterior part of the tooth.

- a) Jawbone
- b) Enamel
- c) Tonsils
- d) Cementum

24. Another name for the mouth is the _____.

- a) Cavity oral
- b) Tongue
- c) Teeth
- d) Oral cavity

25. The tooth has three differentiated parts: crown, neck and root.

- a) True
- b) False

PREGUNTAS DE RESERVA

26. The layer of the tooth underneath the enamel is the _____.

- a) Jawbone
- b) Dentin
- c) Periodontal ligament
- d) Root

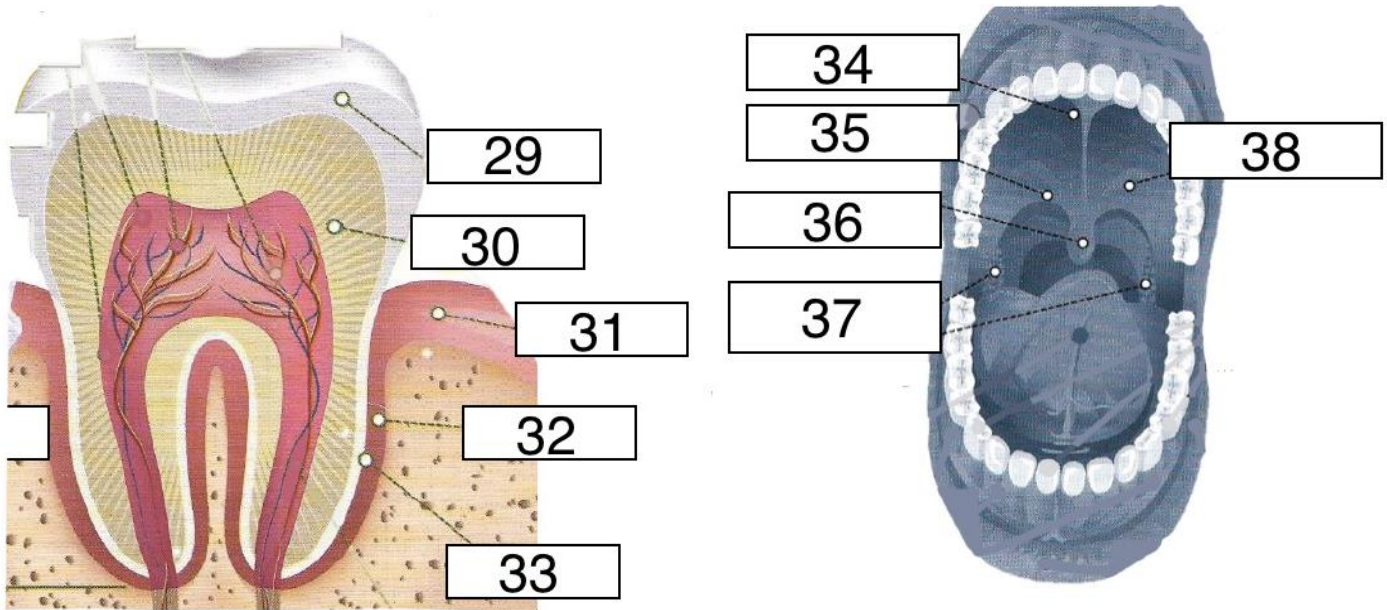

27. The upper and lower lips are part of the mouth.

- a) True
- b) False

28. The periodontal ligament does not secure the tooth tightly to the jawbone.

- a) True
- b) False

Look at the images and complete with the name of the parts of the tooth or the mouth:

PART 4: WRITING

Write an essay discussing the important role that dental hygienists play in promoting oral health. In your essay, consider the following points:

- **Describe the various tasks and responsibilities of dental hygienists in a dental practice.**
- **Explain how dental hygienists perform oral assessments, clean teeth, and carry out proper oral hygiene techniques.**
- **Explore how dental hygienists educate patients about the importance of oral hygiene and its impact on overall health.**
- **Your essay must be between 100-150 words long.**
